**Implementing *SOSMobile*  
Just got Easier!**

**Introducing *SOSMobile Cloud* with  
Subscription Pricing**

If limited IT resources, or the thought of a capital expenditure is preventing your Utility from taking advantage of field force automation, we've got the answer.

With *SOSMobile Cloud*, there's no server hardware to acquire and maintain. Server software is always up-to-date and ready to use. And all data is backed up and protected.

With affordable subscription pricing, getting started is easier than ever. Now even the smallest utilities can save money and increase efficiency with mobile technology.

So why wait? [Contact us](#) today and find out how *SOSMobile Cloud* can help your Utility!

**Out and About**

Please stop by **Booth 122** to see how *SOSMobile* can help your Utility.

We'll be presenting at the NEPPA  
**Engineering and Operations Conference Expo**  
June 3 - 4, 2015  
Danvers Doubletree  
Danvers, MA

## Client News

### Vermont Gas Systems Deploys **SOSDispatch & SOSRemote**

Long time user of *SOSWeb*, the customer self-service module, Vermont Gas Systems in South Burlington, VT is about to go live with the first phase of the rest of *SOSMobile's* offerings.

Serving nearly 50,000 customers in an expanding service territory, they recognized the need to streamline their growing operation through Mobile Workforce Automation.

As their phased implementation proceeds, we'll be sharing some of the innovative plans Vermont Gas has for *SOSMobile's* use. Stay tuned!

### Welcome Hazardville & Jewett City Water Companies

InsightAtlast is pleased to announce that the commonly owned water companies of Hazardville and Jewett City, CT will soon be using our *SOSRemote* module to automate their field work. And because of a partnership between Northern Data Systems (NDS) and InsightAtlast, they will enjoy a tight integration to their NDS EDIFICE™ Utility Management System.

Orders created in EDIFICE will be captured on the field devices running *SOSRemote*. Field workers will then have all the information they need to complete the orders and electronically send the data back to the EDIFICE system.

NDS is taking the lead on this implementation and will provide frontline support for *SOSRemote*.

[Contact us](#) for more information on how *SOSMobile* can benefit EDIFICE users!

## Employee News

InsightAtlast is pleased to announce a new addition to our growing team. **John Morrall**, Sales Manager, has a wealth of experience cultivating relationships and assessing customer needs in order to ensure successful software implementations.

You'll likely be hearing from John in the coming weeks, and we are certain you'll enjoy the encounter.

### About InsightAtlast

*InsightAtlast has helped utilities save money and increase productivity through field force automation since 1999. Our SOSMobile suite of software provides intelligent scheduling, mobile dispatch and real-time updates to and from the field, affordably automating a utility's entire mobile workforce and service order workflow. As integration specialists, SOSMobile is designed to capture and update orders and data from multiple sources, including its own database. Field operations is presented just the information needed to complete work using most any mobile device. And the office has the tools to effectively manage field resources. Since SOSMobile's flexible modules can be tailored to suit any utility's unique mobile workforce, it's currently in use at a diverse array of client sites.*
